DETAILED ACTION

Response to Amendment

1. Applicant's amendment was received on 5/23/05, and has been entered and made of record. Currently, claims 1-16 and 19-21 are pending.

Specification

2. Applicant's amendment to rewrite the abstract to be one paragraph has overcome the objection cited in the previous Office Action. Therefore the objection has been withdrawn.

Applicant's amendments to the specification to correct minor grammatical and typographical errors have overcome the objections cited in the previous Office Action. Therefore the objections have been withdrawn.

Claim Rejections - 35 USC § 101

3. Applicant's amendment to claims 15 and 20 to provide a computer program being embodied in a computer readable medium has overcome the rejection cited in the previous Office Action. Therefore the rejection has been withdrawn.

Allowable Subject Matter

4. Claims 1-16 and 19-21 are allowed.
5. The following is an examiner's statement of reasons for allowance:

Examiner believes it would not have been obvious to one of ordinary skill in the art at the time the invention was made to combine all the claim elements in such a way as to repeatedly divide and manage a print/scan/copy job into smaller and smaller units, starting with a binder, which is a plurality of documents, and repeatedly dividing the job into documents, then into pages, and ultimately into band units, which are smaller than a page, usually a plurality of lines, and process the units on an individual basis as part of an image forming apparatus.

The closest prior art, previously noted as Ishikawa et al. (U.S. Patent No. 5987226) and Kanerva et al. (U.S. Patent No. 6026416) fail to disclose the system as described above. Ishikawa discloses a system for dividing and transferring a print job to a plurality of processors on a network. The processors execute required processes based upon the contents of the information. However, Ishikawa fails to disclose the dividing of print jobs from a binder, into a plurality of documents, into a plurality of pages, and further into a plurality of band units, which are ultimately processed. Kanerva discloses a binder file that comprises a plurality of different documents in their native file format joined together and the ability to process these documents together or separately for processing and subsequent printing. However, Kanerva fails to disclose

the dividing of print jobs from a binder, into a plurality of documents, into a plurality of pages, and further into a plurality of band units, which are ultimately processed.

Therefore, because of these reasons, the claims are rendered allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
